

Important information for overnight stabling at Valinor:

Thank you for entering our USEA Event. We hope you will enjoy your stay with us. Overnight stalls are located in one of our barns. They are convenient to the competition areas, and have all the amenities you would hope for. A restroom, water, cross ties etc. However it is difficult to reach this area with a horse trailer, so we will use a shuttle system from the parking area. When you arrive please pull into the area on the right where you see our trailers parked. We will meet you there and will shuttle the necessary supplies to the barn while you lead your horse. Once your horse is settled you can unhitch and park your trailer in the area designated for overnight trailers. There is parking available very close to the stabling area for your truck. Please let me know which horses you are trailering so I can figure out how many trailers we'll have and your estimated time of arrival when you know it. The stabling barn will close for the night at 10pm.

Thank you and we hope you enjoy our event!
